

The bill will give state wide preemption to Amateur Radio Antennas less than 90 feet tall or be subject to similar language contained in Federal "PRB-1".

The bill is in the Environmental and Technology committee. Senator Mike Nofs is in Charge of that committee. I talked to him last week (week of November 3). He said he will try to get the bill out to the Senate floor after the first of the year. You can call Senator Nofs at 517-373-2426 and urge him help pass the bill out of committee. All the Amateur Radio Operators in Michigan need to call their Senators and urge them to sign onto and pass this legislation.

I have volunteered to testify to the Environmental and Technology committee when they discuss this bill. But most of all I will be emailed as the bill progresses through the committee and the Senate floor.

Please pass the word to as many hams as possible. There is power in numbers. Maybe we can get this bill passed into law this time.
